

Introduction to R

Drew Schmidt

04/2/2015

1. Install R from <http://cran.r-project.org/>
2. Install RStudio from <http://www.rstudio.com/>
3. Experiment with R Commander. Install it via `install.packages("Rcmdr")`. Load it with

```
library(Rcmdr)
```

4. Experiment with rattle. Install it via `install.packages("rattle")`. Load it with

```
library(rattle)
rattle()
```

5. Try your best to install Deducer via `install.packages("Deducer")`. Load it by first starting JGR:

```
library(JGR)
JGR()
```

Then from JGR, run

```
library(Deducer)
```

6. Experiment with the Shiny webapp [Plot Your Data](#). If you need some data, try the iris dataset, which you can get by starting R and entering:

```
write.csv(iris, file="iris.csv")
```

7. Experiment with the Shiny webapp [Radiant Source code](#).
